1. Introduction

This Annual Compliance Report (ACR) addresses the status and compliance of Lot 9, Marmion Avenue, Brighton Urban and Residential Development, WA (Eden Beach, the Project) with the conditions in the Environment Protection and Biodiversity Conservation Act 1999 (EPBC Act) decision notice EPBC 2011/6137 (Appendix A).

1.1 Project background

Satterley Property Group (Satterley) is developing Eden Beach, located 40 km northeast of the Perth Central Business District (CBD) within the City of Wanneroo.

Once completed the Eden Beach development will comprise:

- residential dwellings
- local business centre
- primary school
- coastal node adjacent to the Foreshore Reserve, providing beach access and amenity.

1.2 Environmental approval to implement project

In September 2011, Satterley referred Eden Beach to the then Department of Sustainability, Environment, Water, Population and Community (DSEWPaC; now the Department of Climate Change, Energy, the Environment and Water [DCCEEW]) for determination of whether it constituted a 'controlled action' under the EPBC Act; that is, being likely to have a significant impact on a Matter of National Environmental Significance (MNES). The key MNES potentially affected by the project identified were the endangered species Carnaby's Black-Cockatoo (*Calyptorhynchus latirostris*) and Graceful Sun Moth (GSM) (*Synemon gratiosa*).

On 19 October 2012 the Project was approved under the EPBC Act by the Minister subject to ten (10) conditions prescribed in decision notice EPBC 2011/6137 (Appendix A).

On 18 May 2013, GSM was delisted from the list of Threatened Species pursuant to the EPBC Act. Satterley subsequently lodged a formal variation request to DAWE on 17 July 2013 to remove and amend conditions associated with GSM from EPBC 2011/6137. The Department of Agriculture, Water and the Environment (DAWE) accepted this variation request and issued a 'Variation to Conditions Attached to Approval' on 27 August 2013 (Appendix A). The variation included the following amendments to EPBC 2011/6137:

- deletion of conditions 1, 2, 7, 8 and 10
- amendment of conditions 5 and 6 to remove reference to the GSM Mitigation and Offset Plan, previously required under Condition 1 of the original decision notice
- deletion of definition for GSM
- deletion of Attachments A and B.

On the 16 January 2014, Satterley lodged a formal variation request to DAWE to amend conditions 3c. DAWE accepted this variation request and issued a 'Variation to Conditions Attached to Approval' on the 7 March 2014 (Appendix A). The variation included the deletion of conditions 3c and replacement with an amended condition 3c.

As such, this ACR assesses the following conditions: 3a; 3b; 3c (amended); 4; 5 (amended); 6 (amended); and 9 of EPBC 2011/6137.

2. Current Status

The Project commenced on 21 January 2013 and 30 of the 35 stages of subdivision have been constructed and titled to date. A total of eight community parks have also been developed, including Lot 8005, which comprises the Conservation Area.

In October 2015, the Foreshore carpark providing direct access and allowing residents to access the swimming beach at Eden Beach was opened. Construction on the Eden Beach foreshore landscaped park was completed in September 2016. The development of residential lots is expected to be complete in 2025.

During the auditing period 22 January 2022 to 21 January 2023, POS 8008, POS 8004 and Marmion Avenue were vegetated.

Once complete, the Project will comprise of 1450 residential lots, commercial mixed-use lots, 10 landscaped parks, 13 grouped housing sites, one mixed use lot and a primary school.

3. Audit Methodology

3.1 Purpose and scope

This document has been prepared to assess compliance of the Eden Beach residential development with the conditions of EPBC 2011/6137 and in doing so, address condition 6. Condition 6 requires the proponent to publish an annual compliance report on their website, within three months of every twelve-month anniversary of commencement of the action. Condition 6 states the report shall:

- address compliance with each of the conditions of the approval
- stay on the proponent’s website for five (5) years
- provide proof of the date of publication and non-compliance with any of the conditions of the approval be provided to the Department at the same time the compliance report is published.

Any potential non-compliance detected will be provided to DCCEEW at the same time that the ACR is published on the Satterley website as required under condition 6.

3.2 Audit period

The audit period for this ACR is 22 January 2022 to 21 January 2023, with the report to be published by 21 April 2023.

3.3 Methodology

The audit was desktop based and included a review of a variety of documents. No site inspection conducted in the audit period. Key persons consulted during the audit are listed in Table 3-1.

5. Limitations

This report has been prepared for use by the client who has commissioned the works in accordance with the project brief only, and has been based in part on information obtained from the client and other parties.

The advice herein relates only to this project and all results conclusions and recommendations made should be reviewed by a competent person with experience in environmental investigations, before being used for any other purpose.

JBS&G accepts no liability for use or interpretation by any person or body other than the client who commissioned the works. This report should not be reproduced without prior approval by the client, or amended in any way without prior approval by JBS&G, and should not be relied upon by other parties, who should make their own enquires.

Sampling and chemical analysis of environmental media is based on appropriate guidance documents made and approved by the relevant regulatory authorities. Conclusions arising from the review and assessment of environmental data are based on the sampling and analysis considered appropriate based on the regulatory requirements.

Limited sampling and laboratory analyses were undertaken as part of the investigations undertaken, as described herein. Ground conditions between sampling locations and media may vary, and this should be considered when extrapolating between sampling points. Chemical analytes are based on the information detailed in the site history. Further chemicals or categories of chemicals may exist at the site, which were not identified in the site history and which may not be expected at the site.

Changes to the subsurface conditions may occur subsequent to the investigations described herein, through natural processes or through the intentional or accidental addition of contaminants. The conclusions and recommendations reached in this report are based on the information obtained at the time of the investigations.

This report does not provide a complete assessment of the environmental status of the site, and it is limited to the scope defined herein. Should information become available regarding conditions at the site including previously unknown sources of contamination, JBS&G reserves the right to review the report in the context of the additional information.
