

Catalina

DESIGN GUIDELINES

Stages 36 - 43 (including cottage lots) - February 2024 (Ver 1.8)

Contents

Introduction

- 1.1 Welcome to Catalina Green
- 1.2 Purpose of the Design Guidelines
- 1.3 How to use the Design Guideline Document
- 1.4 Local Development and Structure Plans
- 1.5 Compliance
- 1.6 Approval Application

House Design and Appearance

- 2.1 Front Elevations
- 2.2 Corner Lots
- 2.3 Colour and Materials
- 2.4 The Roof
- 2.5 Crossovers, Driveways and Garages
- 2.6 Laneways
- 2.7 Lot Levels and Retaining Walls
- 2.8 Fencing and Letterboxes
- 2.9 Outdoor Areas and Landscaping
- 2.10 Other Buildings and Services

Checklist

2-Storey Mandatory Dwelling Plan

1.1 Welcome to Catalina Green

Sustainability and connections are at the core of Catalina Green.

Through advanced planning and design the estate has embraced the existing landform and sought to nestle the development among the existing trees and vegetation. This unique approach allows you to build your dream home among new infrastructure with a natural backdrop.

Access to transport is easy with a vast bike and foot path network that will provide connections to Ocean Keys Shopping Centre, Clayton Beach, Mindarie Marina and Clarkson Train Station. With all this on your doorstep why would you want to be anywhere else? But should you want to venture further afield the freeway and train station are right there for you.

Catalina Green offers the perfect location that balances beach, bush, shops and city.

**WHERE URBAN LIVING
MEETS CONVENIENCE**

1.2 Purpose of the Design Guidelines

The Design Guidelines apply to residential lots within Catalina Green and will help you and your chosen builder to design a high quality home that fits in with the aesthetic of the estate.

The appearance of housing, front yards and verges contribute to community pride and property values. The Design Guidelines provide helpful information to assist you to design your new home.

The Design Guidelines are a framework for design decisions and provide for:

- A cohesive community
- Attractive streetscapes
- Quality housing design
- Appropriate architectural Styles
- Individuality
- Community safety and security
- Climate responsive design
- Confidence in your investment

1.3 How to use the Design Guidelines

To ensure your home meets the requirements of the Design Guidelines, your Contract of Sale specifies that you must submit your preliminary design for Satterley's approval prior to lodging plans with the City of Wanneroo. A checklist for mandatory requirements has been included at the end of this document.

The Design Guidelines include mandatory elements that must be complied with and design elements that you are strongly encouraged to consider.

1.4 Local Development and Structure Plans

In addition to these Design Guidelines, a Local Structure Plan (LSP) and Local Development Plans (LDP's) have been prepared over some lots within Catalina Green. The LSP and LDP's set out permissible variations to the Residential Design Codes that have been adopted by the City of Wanneroo. Compliance with the LSP and LDP's is assessed by the City of Wanneroo as part of your application for Development Approval and/or Building Licence.

The LSP and LDP's identify requirements for a number of items, including but not limited to the following;

- Dwelling orientation
- Building setbacks
- Public open space interface
- Private open space and outdoor living areas
- Vehicle access and garage locations
- Boundary Walls
- Visual Privacy
- Design for Climate

1.5 Compliance

Satterley's approval ensures all homeowners meet the Design Guidelines mandatory requirements. Compliance with mandatory design measures (Design Requirements) is a contractual obligation. City of Wanneroo approval ensures compliance with statutory and policy requirements.

Individuality, architectural expression and innovation are promoted. Alternative designs will be considered where the vision of Catalina Green is main-

tained. Approval of alternative designs does not set a precedent.

The Design Guidelines must be read in conjunction with Catalina Green Local Development Plans as approved by the City of Wanneroo, local laws and policies, Residential Design Codes of Western Australia (R Codes) and other statutory requirements. Satterley does not warrant the City of Wanneroo will approve a house plan if it satisfies these Design Guidelines.

1.6 Approval Application

Building plans must provide the following and should be lodged electronically in PDF format to plans@satterley.com.au

SITE PLAN

Include levels, location of dwelling and garage, boundary setbacks, all fences, retaining walls and other outbuildings.

FLOOR PLAN

The proposed house design and room layout, including window and door locations, alfresco areas, etc.

ELEVATIONS

Materials and colours schedule for walls, the roof and trims. Ceiling heights are to be shown as well as roof pitch.

Purchasers are responsible for checking whether any of the following items apply prior to design;

- Local Development Plans;
- Existing infrastructure such as retaining walls, fences, utilities, or similar; and
- Bushfire management plans

House Design and Appearance

These Design Guidelines set a number of mandatory and encouraged requirements that you and your chosen builder will need to meet when designing your new home. These act as a guide to ensure a high-quality home is built that is in keeping with the estate and your neighbours.

Sustainability is at the core of Catalina Green and we encourage you to continue this within your house design. A home designed to suit the lot and local conditions can enhance comfort, ease household energy and water costs and provide long term environmental benefit.

Catalina Green is proud to have been awarded the highest possible sustainability accreditation from the Urban Development Institute of Australia. Catalina Green has been awarded for its sustainability in Ecosystems, Waste, Energy, Materials, Water and Community. To find out more visit;

www.envirodevelopmentliving.com.au

We encourage you to investigate sustainable building options and climate responsive design including solar access, natural ventilation, thermal and water efficiency. Further information on this can be obtained from:

www.water.wa.gov.au

www.yourhome.gov.au/technical

Catalina Green benefits from good access to natural light and cooling breezes. Simple items to consider when planning your home include:

- Orientating important internal living areas such as the kitchen, family room or lounge to have access to northern winter sun;
- Protecting north and west facing rooms from summer sun through shading devices, deeper eaves or appropriate plantings;
- Placing window openings to increase natural airflow, particularly through key living spaces;
- Zoning internal living and sleeping areas to allow for localised heating and cooling; and
- Locating hot water systems as close as possible to the kitchen and main bathroom.

Satterley reserves the right to amend the Catalina Green Design Guidelines at any point in time.

2.1 Front Elevation

The front elevation is your home's public face and makes the greatest contribution to maintaining a consistent visual aesthetic across the estate. This can be achieved by ensuring that the following requirements are incorporated in the design of your new home.

Mandatory requirements

ADDRESSING THE STREET

- The front of your home must contain the front door and have window/s with a clear view of the street. The front door must not be accessed from the garage.
- At a minimum, a mandatory two-storey dwelling shall contain a habitable room on the upper level. The room cannot be located entirely within the roof space and must have at least one major opening (or balcony) addressing any each public street (subject to compliance with design element 5.4.1 (Visual Privacy) of the Residential Design Codes).

ENTRY FEATURE

- A veranda, portico or porch must be provided to the front of the house to create an open and welcoming entry for your home. This should be a minimum of 1.5m in covered depth.

MATERIALS

- At least three of the following materials must be provided in the front elevation of your home (excludes roof, door and window treatments) each comprising no less than 15% of total front elevation wall:
 - * Face brickwork;
 - * Rendered brickwork;
 - * Contrasting rendered brickwork;
 - * Stone pattern render;
 - * Feature tiling;
 - * Stone cladding;
 - * Timber garage door;
 - * Timber cladding, weather boarding, or reconstituted materials;
 - * Other materials to be approved on a case by case basis by Satterley.

Note: No colour repetition permitted.

- For rear-access cottage lots with less than 10m frontage only, at least two materials are required.

ELEVATION FEATURE

- On the primary street elevation, at least one of the following architectural elements are to be incorporated:
 - * Gable or gambrel;
 - * Roof gable (dutch gable, gablet, gambrel);
 - * Planter box (minimum 1.5m width);
 - * Bay window;
 - * Balcony;
 - * Blade wall; or
 - * Other feature wall.
- In addition to any porch/portico the front elevation must have eaves with a minimum depth of 450mm, except the garage and where a boundary wall is proposed; and
- Excluding the garage, the front elevation must contain at least one indentation or projection in the floor plan, also mirrored in the roof plan to provide visual interest. This articulation must be at least 450mm deep.
- For single-storey rear-access cottage lots with less than 10m frontage, a minimum wall height to the front elevation of 2.7 metres above the floor level excluding the garage.

Individuality, architectural expression and innovation are promoted. Alternative designs will be considered where Catalina Green's vision is maintained. Approval of alternative designs does not set a precedent.

2.2 Corner Lots

Providing 'eyes on the street' is an important contributor to people's perception of their safety.

Mandatory requirements

The following requirements need to be incorporated into the design of your home:

- The main colour and materials used on the primary elevation must 'wrap' around the corner for the portion of the home visible from the street (two metres from the building line) with the same design qualities and character to enhance street appeal. No additional elevation features are required.
- The exposed secondary street façade must incorporate at least one window.

Encouraged requirements

- Verandas extending from the front of the home around to the secondary elevation, and windows that increase neighbourhood security are encouraged.

2.3 Colours and Materials

Variations in colour and texture are promoted. Colour tones should be complimentary, take cues from the local landscape and express individuality through carefully chosen accents.

Mandatory requirements

- Avoid the use of primary and vivid colours as well as reflective surfaces.

Encouraged requirements

- The use of lighter tones is promoted. Bold and dark colours are best used in small sections against a neutral or subdued backdrop.

2.4 The Roof

The roof is a key element of your home's architectural character. If designed effectively it will improve the environmental performance of your house, as well as providing space for solar hot water units and photovoltaic panels.

Mandatory requirements

To provide a more consistent appearance across the estate, your roof design should be simple and uncluttered. To achieve this it must meet the following criteria:

- Skillion roofs to have a minimum pitch of five degrees and a maximum pitch of 15 degrees;
- Traditional pitched hip and valley roofs:
 - * Lots with a frontage greater than 10m to the primary street - roof form pitched at an angle greater than 22 degrees; or
 - * Lots with a frontage equal to or less than 10m to the primary street - roof form pitched at an angle greater than 24 degrees.
- Must be constructed in a single material and colour.
- Highly reflective roofs such as zincalume are not permitted.

Encouraged requirements

- A light coloured roof is encouraged to reduce solar absorbency and energy usage;
- Simple forms reflecting the setting, with generous eave overhangs to shade windows are encouraged; and
- Pre-finished corrugated metal sheeting and low profile roof tiles are encouraged.

2.5 Crossovers, Driveways and Garages

Streetscape and security is enhanced through the careful design of your crossovers, driveways and garages .

Mandatory requirements

The following requirements need to be incorporated into the design of your home:

- Your driveway must be constructed from brick paving, liquid limestone or exposed aggregate concrete. Grey or painted concrete is not permitted;
- Public footpaths take priority over private vehicular access therefore driveways must not cut-through paths;
- The location of your garage must take into account where the crossover and driveway will go to avoid the removal of street trees and not conflict with service infrastructure such as power domes;
- Laying an appropriate pipe under the driveway and paved areas must be included in your plans to ensure landscape irrigation can be installed;
- Streetscape and security is enhanced when garages are to be setback a minimum of 4.5m from the primary street and are not to be forward of the dwelling alignment, unless reduced further by the LDP. Garages may be aligned with the dwelling provided they do not exceed the garage setback line. Garages are to be setback 1.5m metres from the secondary street;
- Garages may be forward of the front building line to a maximum of one metre for two storey dwellings where the garage alignment complies with the primary setback;
- All garages shall be enclosed with a door and installed prior to occupation; and
- Car ports are not permitted.

Encouraged requirements

- Internal garage storage is encouraged.

2.6 Laneways

Security is enhanced through the careful design of laneway homes.

Mandatory requirements

If your home is located on a laneway lot, you will need to consider the following requirements when designing your home:

- Vehicle access must be from the laneway;
- The garage door must not project into the laneway when opened or closed; and
- The front of your home overlooks the adjoining street or park, not the laneway.

Encouraged requirements

- The laneway elevation should complement the rest of your home, with the same design qualities and character; and
- Where possible, provide a major opening from a habitable room to overlook the laneway.

2.7 Lot Levels and Retaining Walls

Your lot levels and retaining walls have been designed, constructed and certified taking into account site classification and drainage requirements.

Mandatory requirements

- Lot levels are set as part of estate works and are not to be modified; and
- Modifications to retaining walls installed by the developer are not allowed unless for maintenance or where written approval by Satterley and City of Wanneroo has been granted;

2.8 Fencing and Letterboxes

To help create a friendly, open and welcoming street it is important for the following to comply.

Mandatory requirements

- Installing a front fence is not permitted;
- Some lots may have a fence provided by the developer. Modifications to fences installed by the developer are not permitted unless for maintenance or where approved by Satterley in writing;
- Fencing is not permitted within the front setback area of a lot (including forward extensions of side boundary fencing and fencing on corner truncations);
- Side and rear boundary fencing must be 1.8m high, estate Jasper Matt Colorbond fencing. The finish of any side or rear boundary gates should complement the fence (except where a pillar has been constructed by the developer, in which case side fencing is not permitted forward of the pillar); and
- Corner lots side fencing must be installed two metres back from the forward most point of the closest wall of your home to the boundary.

2.9 Outdoor Areas and Landscaping

Your outdoor living area should be designed to receive northern winter sun whilst providing protection from rain, winter breezes and the hot summer sun. Well-designed front yard and verge areas can increase security, privacy, energy efficiency, water efficiency and improve the presentation of your home.

Your landscape design and plant selection should respond to local conditions and homeowners are encouraged to consider native and water-wise options. Decking and the use of aggregates can reduce turf and garden areas.

Mandatory requirements

- Provide reticulation to verge areas, complete landscaping prior to occupation and continue to maintain lawn and garden areas.

By submitting your plans and gaining Satterley's approval (and meeting the terms and conditions of your contract), will allow you to claim the Catalina Green front landscaping rebate. Once installed the front landscaping package should not be removed or significantly altered.

2.10 Other Buildings and Services

Sheds and other enclosures should be considered when planning your site to minimise the impact on outdoor living spaces and visual amenities.

Mandatory requirements

- Studios and ancillary accommodation should be constructed in complementary materials and colours to your home;
- Any shed, storeroom, outbuilding or other freestanding structure should be located in your backyard to minimise visibility from adjacent streets, laneways and parks and constructed in materials and colours that complement your home;
- For corner lots, sheds and outbuildings shall not extend 500mm above fences and shall not be greater than 10sqm in floor area;
- Building services such as air-conditioning units, satellite dishes, TV antennae, solar hot water units, photovoltaic

panels and down pipes must be screened from public view or located in the least visibly obtrusive location from adjacent streets and parks;

- Clothes drying areas must be screened from view from adjacent streets and parks. They should be well located to access sunlight and breezes; and
- Bin storage areas must be screened from view from adjacent streets and parks. It is encouraged to install a water tap adjacent to your bin storage area.

Encouraged requirements

- Photovoltaic panels and solar hot water units should be positioned to access northern and western sunlight and should be integrated with the roof profile of the home and not elevated at any angle to the roof pitch; and
- Building services should be finished in a similar colour to the roof and located to minimise potential nuisance, such as noise to neighbouring properties.

Checklist

To be submitted with building plans to Satterley for approval.

Mandatory Requirements

Addressing the Street

- The front of your home must contain the front door and have window/s with a clear view of the street. The front door must not be accessed from the garage.

Note: No colour repetition permitted.

- For rear-access cottage lots with less than 10m frontage only, only two materials are required. All other guidance notes still apply.

with less than 10m frontage, a minimum wall height to the front elevation of 2.7 metres above the floor level excluding the garage.

Entry Feature

- A veranda, portico or porch must be provided to the front of the house to create an open and welcoming entry for your home. This should be a minimum of 1.5m in covered depth.

Elevation Feature

- On the primary street elevation, at least one of the following architectural elements are to be incorporated.
 - * Gable or gambrel;
 - * Roof gable (dutch gable, gablet, gambrel);
 - * Planter box (Minimum 1.5m width);
 - * Bay window;
 - * Balcony;
 - * Blade wall; or
 - * Other feature wall.

Corner Lots

- The main colour and materials used on the primary elevation must 'wrap' around the corner for the portion of the home visible from the street (two metres from the building line) with the same design qualities and character to enhance street appeal. No additional elevation features are required.
- The exposed secondary street façade must incorporate at least one window.

Materials

- At least three of the following materials must be provided in the front elevation of your home (excludes roof, door and window treatments) each comprising no less than 15% of total front elevation wall:
 - * Face brickwork;
 - * Rendered brickwork;
 - * Contrasting rendered brickwork;
 - * Stone pattern render;
 - * Feature tiling;
 - * Stone cladding;
 - * Timber garage door;
 - * Timber cladding, weather boarding, or reconstituted materials;
 - * Material approved by Satterley.

- In addition to any porch/portico the front elevation must have eaves with a minimum depth of 450mm, except the garage and where a boundary wall is proposed; and
- Excluding the garage, the front elevation must contain at least one indentation or projection in the floor plan, also mirrored in the roof plan to provide visual interest. This articulation must be at least 450mm deep.
- For single-storey rear-access cottage lots

The Roof

- Skillion roofs to have a minimum pitch of 5 degrees and a maximum pitch of 15 degrees.
- Traditional pitched hip and valley roofs:
 - * Lots with a frontage greater than 10m to the primary street - roof form pitched at an angle greater than 22 degrees; or
 - * Lots with a frontage equal to or less than 10m to the primary street - roof form pitched at an angle greater than 24 degrees.

Checklist (Continued)

Mandatory Requirements

Roof (Continued)

- Must be constructed in a single material and colour.
- Highly reflective roof tops such as zincalume are not permitted.

Colours and Materials

- Avoid the use of primary and vivid colours and reflective surfaces.

Crossovers, Driveways and Garages

- Your driveway must be constructed from brick paving, liquid limestone or exposed aggregate concrete. Grey or painted concrete is not permitted.
- Public footpaths take priority over private vehicular access therefore driveways must not cut-through paths.
- The location of your garage has taken into account where the crossover and driveway will go to avoid the removal of street trees or conflicts with service infrastructure such as power domes.
- Laying an appropriate pipe under the driveway and paved areas has been included in your plans to ensure landscape irrigation can be installed.
- Garages are to be setback a minimum of 4.5m from the primary street and are not to be forward of the dwelling alignment. Garages may be aligned with the dwelling

provided they do not exceed the garage setback line. Garages are to be setback 1.5m from the secondary street.

- Garages may be forward of the dwelling alignment to a maximum of one metre for two storey dwellings where the garage alignment complies with the primary setback.
- All garages shall be enclosed with a door and installed prior to occupation.
- Car ports are not permitted.

Laneways

- Vehicle access must be from the laneway.
- The garage door must not project into the laneway when opened or closed.
- The front of your home overlooks the adjoining street or park, not the laneway

Lot Levels

- Lot levels have not been modified.

Front Fencing and Letterboxes

- Fencing is not permitted within the front setback area of a lot (including forward extensions of side boundary fencing and fencing on corner truncations).
- Side and rear boundary fencing must be 1.8m high, estate Jasper Matt Colorbond fencing. The finish of any side or rear boundary gates should complement the

fence (except where a pillar has been constructed by Satterley, in which case side fencing is not permitted forward of the pillar).

Other Buildings and Services

- For corner lots, sheds and outbuildings shall not extend 500mm above fences and shall not be greater than 10sqm.
- Building services such as air-conditioning units, satellite dishes, TV antennae, solar hot water units, photovoltaic panels and downpipes must be screened from public view or located in the least visibly obtrusive location from adjacent streets and parks.
- Clothes drying areas must be screened from view from adjacent streets and parks. They should be well located to access sunlight and breezes.
- Bin storage areas must be screened from view from adjacent streets and parks. It is encouraged to install a water tap adjacent to your bin storage area.

Other Important Items

- Checked for the existence of Local Development Plans, special geotechnical requirements, Bushfire management plans, BAL ratings and/or infrastructure items that may impact design.
- Site plan, floor plan and elevations included within the application for Satterley's approval.
